About Centerline:

Centerline (Windsor) Limited is a privately held corporation that builds custom automated welding and assembly lines and standard brand products for fastener welding, resistance welding (steel, high strength steel, hot-stamped steel, and aluminum) metal joining, metal forming and metal coating applications in the he automotive, mass transit, aerospace and defense industries.

The campus features several facilities devoted to CenterLine's divisions:

Machinery	Automated equipment and turnkey systems
Electrodes	Consumable electrode products
Automation	Spot welding guns, actuators, presses, components
Supersonic	Cold Spray - manual & automated systems, powders
Mechatronics	Standard brand products and product development

The Resistance Welding Manufacturing Alliance (RWMA), an industry partner of the American Welding Society, is an active network of industry professionals dedicated to the advancement of resistance welding standards and processes. The alliance supports the industry's highest technical standards, share best practices and prepare future generations for success. RWMA members include machinery, component, and electrode manufacturers, as well as distributors, suppliers, educators and end users.
